

**LUMATECH**  
**BRIGHT PEOPLE. BRIGHTER SOLUTIONS.**

## **IT PAYS TO PICK THE RIGHT RETROFIT PARTNER**

**Save Time. Save Money. Sidestep Mistakes.**

From New Construction To Remodels, Simplify Your Project With The Ease  
And Money-Saving Speed Of Lumatech's Lighting Retrofit Specialists

## ? WHY WORK WITH A LIGHTING RETROFIT SPECIALIST?

Let's face it: Lighting retrofits and upgrades require specialized expertise. And each industry has its own unique needs. That's why we're laser focused on lighting—and offer advantages tailored to the general contractor community:

### **LIGHTING'S NOT A SIDE BUSINESS. IT'S OUR SOLE BUSINESS.**

Lighting is complex and constantly changing. And your specs demand specific technologies and specialized skills. The fact is, electricians don't have the training in lighting retrofits and upgrades—where learning curves and lack of equipment can put you over in both time and budget. As specialized professionals, we have the expertise to ensure your project runs smoothly and meets your goals in terms of time and money.

### **OUR CERTIFIED LIGHTING PROFESSIONALS COMPLETE PROJECTS ON TIME AND UNDER BUDGET.**

We're the area's only lighting service provider to employ technicians that are all CSLT or CALT certified. But we take certification a step further. All our technicians are also state-certified electricians, giving them a deeper money- and mistake-saving understanding of lighting services.

### **WE ANTICIPATE AND ADDRESS ISSUES BEFORE THEY CAN BLOW YOUR BUDGET.**

Since we've performed so many lighting upgrades, we have the expertise to troubleshoot right from the start. With practiced preplanning, we can forecast and eliminate the issues that cause lighting projects to go over budget and past deadline.

### **OUR RANGE OF RETROFIT SERVICES MEETS CONTRACTOR NEEDS**

We've created a lineup of lighting upgrade services with breadth and depth that caters to both remodels and new construction:

- Energy-efficient lighting retrofits: LED, HID, linear fluorescent & induction
- Indoor T12 to T8 conversions
- High-bay relighting & retrofits
- Occupancy sensors & lighting controls
- Incentive & rebate management

# ONE CALL DOES IT ALL

As your one-stop lighting solution, we go beyond retrofits and upgrades, bringing our expertise to a full menu of services:

## MONEY-SAVING PLANNED MAINTENANCE

LumaTech is the region's sole provider of planned lighting maintenance services. We take the hassle out of maintenance and repair with customized programs that improve performance, provide significant cost savings, and keep your lighting system running smoothly.

- System evaluation
- Customized packages
- Fixed-fee contracts
- Fixture repairs & replacement
- Group relamping
- Night audits & inspections
- 24/7 emergency service calls

## STATE-OF-THE-ART ILLUMINATED SIGN SERVICE

Sign outages mean missed business. Period. Our lighting and electrical skill—plus a fleet of advanced aerial equipment—allows us to install, maintain, service, and repair all types of illuminated signs. You simply shouldn't trust illuminated signs to anyone but LumaTech.

- LED & neon expertise
- Light source, wiring & other repairs
- Light source replacement
- Refurbishment & re-facing
- Bird control

## STANDOUT ELECTRICAL SERVICES

Yes, we're the lighting leaders. But since all of our lighting experts are state-certified electricians, we are doubly qualified to deliver lighting-related and standalone electrical services. Easily bundled for savings, all electrical projects benefit from our expert project-management system—including daily progress reports and superior efficiency in meeting proposed schedules.

- Troubleshooting
- Electrical upgrades
- Circuit installation
- Meter loop installation
- Panel swap-outs
- Rollout projects
- Electric-vehicle charging stations
